

The use of the tray sealing technology in the fish industry can take advantage of all the benefits and experiences developed for all the other protein markets. Convenient and MAP protected formats are delivered to the consumers and a Case-Ready solution is available for the retailers with all the benefits associated to it.

✓ Case-Ready solution

✓ Extended shelf-life

✓ Convenience through different packaging technologies

## Tray sealers

G. Mondini offers a whole range of sealing machines which can easily switch from the production of bulk packaging to the production of retail packs, keeping the usual flexibility and an excellent productive efficiency.

We take care of the different phases of the whole packaging process, starting from the tray denesting, to the product loading up to the tray sealing, taking into consideration all the different integrations needed for the different products.

We provide integrated solutions and the engineering to maximize the efficiency of the line by means of semiautomatic or fully automated loading systems and the addition of filling units for both liquid and solid components.

## Shallow packs

- Allowing the product to remain protruding, the shallow pack gives an excellent product visibility.
- Vertical display.
- Safety from the point of view of the package tightness and shelf-life.

Whole fishes

Further processed products

Sliced products

## Ready to Cook

- Consumer benefit and convenience from a ready to cook product are even greater on fish, which is traditionally difficult to prepare. Top lidding offers immediate access to technologies and packaging formats already available.

## Bulk packaging

- An excellent alternative to the standard distribution via EPS.
- MAP product.
- Totally automated solution.
