# Fruit & Vegetables

Fruit and vegetables are a unique product to pack because they are alive and freshness appearance is a key selling point. We propose solutions based both on top sealing and rigid snapping. To cope with the wide range of products and their breathing characteristics we provide an inline film perforation device while for the rigid lidding we offer solutions which are both high speed and flexible.

✓ Shelf friendly packs

✓ In line film perforation to suit specific product needs

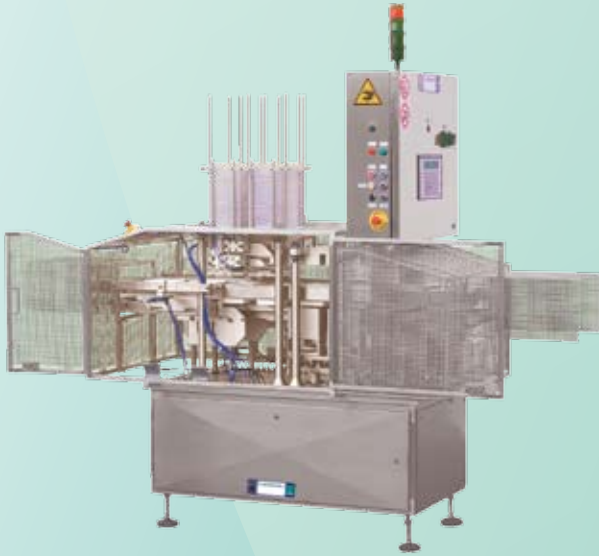

✓ Freshness appeal

## Snap on lid

Solutions from 25 to 90 packs per minutes.

All models allow a quick change over with limited number of components for a simple and low investment changing of format.

## Tray sealing

We provide systems from 25 to 140 trays per minutes.

All machines can be provided with an inline perforation system.

Such system allows a quick change of hole diameter and hole pitch.

## Rigid Lids

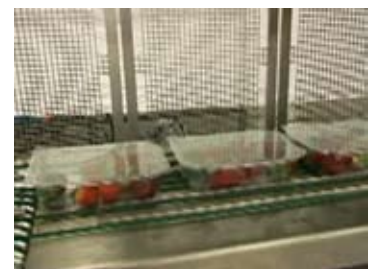

- Ultra wide choice of shapes for maximum pack appearance.

## Top Lidding

- Different holes patterns allow to achieve the best environment for each single type of vegetables.

- Paper board based tray: environmental friendly and moisture absorbent.
